SUMMARY

Results-driven Data Scientist with 3+ years of experience delivering machine learning, predictive analytics, and scalable data solutions across retail, manufacturing, and consumer analytics domains. Experienced in building Python, SQL, and PySpark-driven forecasting, pricing intelligence, customer segmentation, and anomaly detection solutions supporting business intelligence and operational decision-making initiatives. Skilled in developing ETL pipelines, cloud-based ML workflows on AWS and Azure, and translating analytical insights into actionable recommendations through cross-functional collaboration within Agile environments.

TECHNICAL SKILLS

Programming & Data Processing: Python, SQL, SAS PROC SQL, Pandas, NumPy, Data Cleaning, Data Wrangling, Exploratory Data Analysis, Feature Engineering, ETL Pipelines, REST APIs, Web Scraping

Machine Learning & Analytics: Predictive Modeling, Classification, Regression, Clustering, Statistical Analysis, Time Series Forecasting, Anomaly Detection, NLP, Generative AI, Customer Segmentation, Demand Forecasting, Pricing Analytics, Predictive Maintenance, Consumer Behavior Analytics

Big Data & Engineering: Apache Spark, PySpark, Spark SQL, Airflow, Databricks, Distributed Data Processing, Batch Processing, Data Integration, Data Transformation, Data Quality Monitoring

Visualization & Reporting: Power BI, Tableau, Dashboard Development, KPI Reporting, Business Intelligence, Data Visualization

Cloud, MLOps & Infrastructure: AWS (SageMaker, EC2, S3), Microsoft Azure (Azure ML), Docker, CI/CD Pipelines, Workflow Automation, Containerization, Cloud-Based Analytics Solutions

PROFESSIONAL EXPERIENCE

Data Scientist, Course5 Intelligence

Jan 2025 - Present | Remote, USA

- Developed customer analytics and churn prediction models using Python, SQL, and Scikit-learn, improving campaign targeting accuracy by 35% and enhancing consumer behavior analysis across large-scale retail business datasets.
- Built scalable ETL and feature engineering pipelines using PySpark, Spark SQL, Airflow, and Databricks, supporting efficient analytics, processing over 6TB retail datasets daily, and optimizing large-volume reporting workflows.
- Applied XGBoost and TensorFlow models for demand forecasting, customer segmentation, and sales trend analysis, increasing forecast accuracy by 28% while supporting retail planning and marketing optimization initiatives.
- Designed Tableau and Power BI dashboards tracking KPI reporting, sales forecasting metrics, and operational analytics, enabling cross-functional stakeholders to monitor business performance and reporting trends.
- Supported deployment and monitoring of cloud-based machine learning workflows using AWS SageMaker, Docker, and REST APIs within Agile analytics environments to support scalable business intelligence operations.

Data Scientist, Sonaflex Industries

Jun 2023 - Jun 2024 | GJ, India

- Built anomaly detection and predictive maintenance models using Python and AWS SageMaker, improving monitoring accuracy by 35% across IoT-driven manufacturing operations and equipment datasets.
- Automated SQL and Python-based feature engineering and data transformation workflows, improving processing efficiency by 40% across ERP and manufacturing analytics pipeline operations.
- Developed statistical validation and cost forecasting models using SAS PROC SQL, supporting variance analysis and operational reporting across manufacturing business datasets.
- Generated stakeholder-facing analytical reports summarizing forecasting insights, production trends, and manufacturing performance metrics, reducing reporting turnaround time by 30% and supporting business decision-making initiatives.
- Collaborated with engineering and analytics teams to validate production datasets and support scalable machine learning deployment workflows within manufacturing analytics environments.

Data Analyst, Procmart

April 2022 - May 2023 | Remote, India

- Analyzed sales, customer, and inventory datasets using SQL and Excel, improving reporting accuracy by 32% while supporting daily operational and business performance analysis workflows efficiently.
- Developed interactive Power BI dashboards tracking revenue trends, reducing manual reporting time by 41% and enabling management teams to monitor key retail performance indicators more effectively. Analyzed retail transaction and procurement datasets using Python and Excel, identifying purchasing trends and inventory optimization opportunities across operations.
- Automated data cleansing and validation processes using Python and SQL, ensuring accurate transaction reporting and improving reliability across retail analytics and inventory management operations consistently.
- Collaborated with cross-functional teams to analyze customer purchasing behavior, increasing campaign response rates 24% and supporting targeted marketing and customer retention initiatives across retail business operations.
- Prepared stakeholder-facing reports and KPI summaries using Excel, Tableau, and SQL, supporting forecasting, inventory planning, and data-driven decision-making across retail business functions and operational departments.

Projects

- Speech-to-Speech Translation - Cascading Connector Architecture**

Aug 2025 - Nov 2025

 - Architected a multimodal NLP pipeline integrating Whisper ASR, machine translation, and TTS models through cascading connector architecture supporting multilingual speech translation workflows.
 - Engineered cross-modal embedding alignment connectors and benchmarked multilingual translation models, improving training efficiency, inference scalability, and BLEU translation performance significantly.
- Tesla Stock Price Prediction and Sentiment Analysis**

Mar 2025 - May 2025

 - Engineered an NLP and machine learning forecasting pipeline integrating technical indicators and sentiment signals from Reddit, Guardian, and NYT APIs successfully.
 - Trained XGBoost and Random Forest forecasting models using walk-forward validation and SHAP analysis, improving interpretability and stock trend prediction performance significantly.

CERTIFICATION

- AWS Certified Cloud Practitioner** – AWS ([Link](#))
- Software Engineering Job Simulation** - JPMorgan Chase & Co. ([Link](#))
- CompTIA security** – Udemy([Link](#))
- Web Development** – Udemy([Link](#))

EDUCATION

- Master of Science, Rutgers University**

Sep 2024 - May 2026 | NJ, USA

Data Science | GPA - 3.5
- Bachelor of Engineering, Dypatil University**

Aug 2019 - May 2023 | Mumbai, India

Electronics | GPA: 3.87
